

OConnor

Ultimate 1030 & 1030Ds Fluid Heads

1030D for cameras up to 30 lbs (13.6 kg)

1030Ds for cameras up to 41 lbs (18.6 kg)

Specifications	1030D	1030Ds
Capacity @ 6 in.	30 lbs. (13.6kg)	41 lbs. (18.6kg)
Platform	Sideload	Sideload
Base	100mm	100mm
Tilt	+90° / -90°	+60° / -60°
Height	6.6 in (16.8 cm)	6.6 in (16.8 cm)
Width	7.6 in (19.3 cm)	7.6 in (19.3 cm)
Depth	4.6 in (11.7 cm)	4.6 in (11.7 cm)
Weight	8.7 lbs (3.9 kg)	8.7 lbs (3.9 kg)
Counterbalance	Sinusoidal	Sinusoidal
Pan & Tilt Drag	Stepless	Stepless

1030D & 1030Ds

The 1030D and Ds offer features originally engineered for the larger OConnors to let cinematographers seamlessly transition from heavier to lighter camera setups. These include the stepless, ultra-smooth pan and tilt fluid drag specifically enhanced to provide ultimate control and stability for digital cinematography shooting. The patented OConnor Sinusoidal Counterbalance system provides true, accurate balance at any point in the tilt range. Users will appreciate that the system counterbalances down to zero, a handy advantage since there is a trend to lighter weight cameras. For today's versatile shooter, the transition from larger to smaller payloads has never been easier. And most importantly, the famous OConnor feel, remains the same regardless of payload.

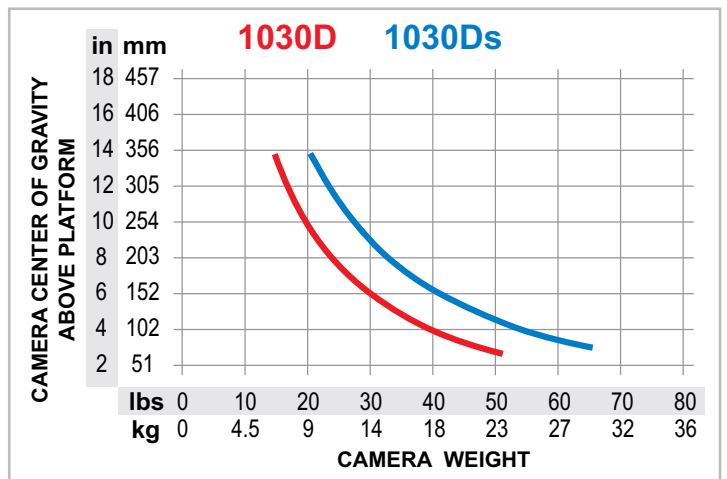

The new ergonomic crank-style counterbalance control simply pulls out of the rear of the head. Plus the Action Brakes for pan and tilt unlock through a single-handed squeeze. And the new sideload platform enables rapid attachment of the camera as well as an extended range of movement for balancing front heavy setups.

The OConnor 1030D supports a payload up to 30 lbs. (13.6 kg) at a 6" (15cm) center of gravity and a +/-90° tilt range. The 1030Ds supports heavier payloads up to 41 lbs. (18.6 kg) at 6" (15cm) COG with a +/- 60° tilt range.

Like the rest of the OConnor Ultimate heads, the 1030D and Ds have interchangeable bases (e.g. 150mm or Mitchell for the 1030), accept the same front box mount as larger heads and offer full compatibility with other OConnor 1030 accessories. OConnor's new 30L carbon fiber tripod system offers an expanded payload range in a lighter weight package which makes it the perfect companion for the 1030D and 1030Ds.

COUNTERBALANCE CHART
